1 Enter the Real-time transcription interface

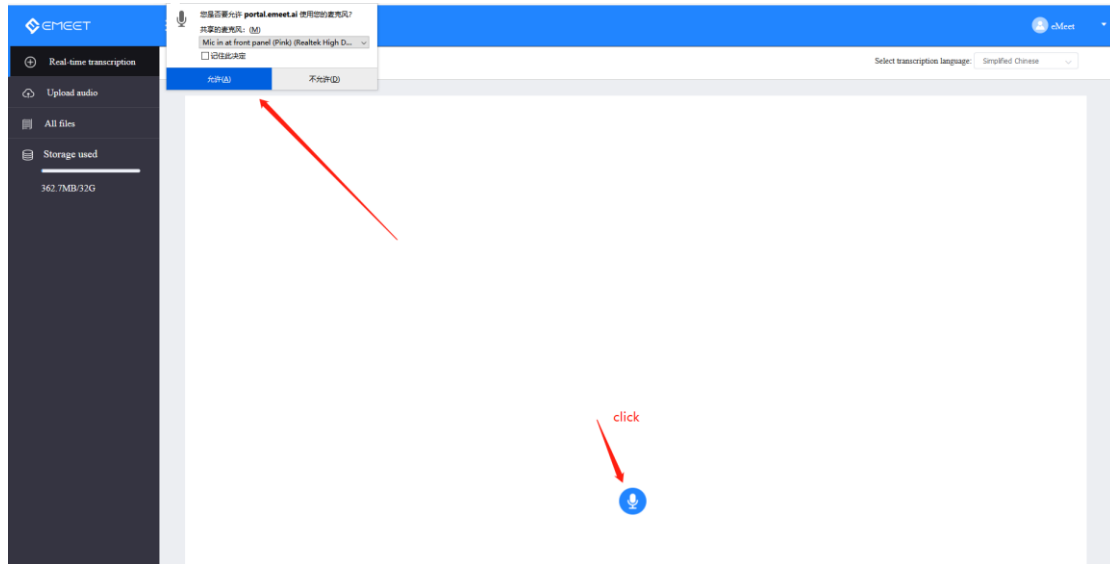

Please visit <https://portal.emmeet.ai>

2 Select transcription language

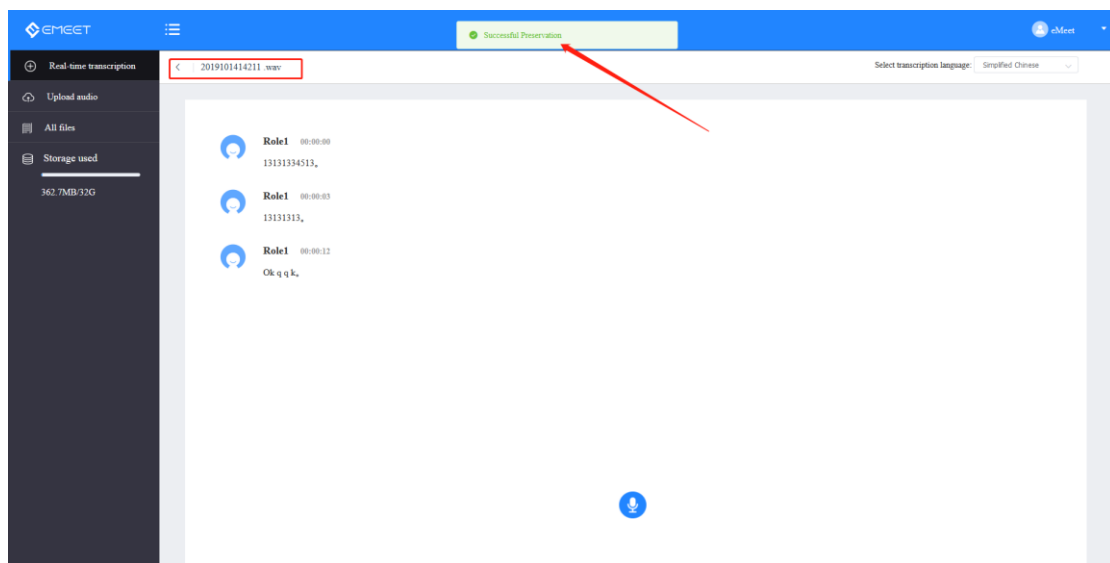

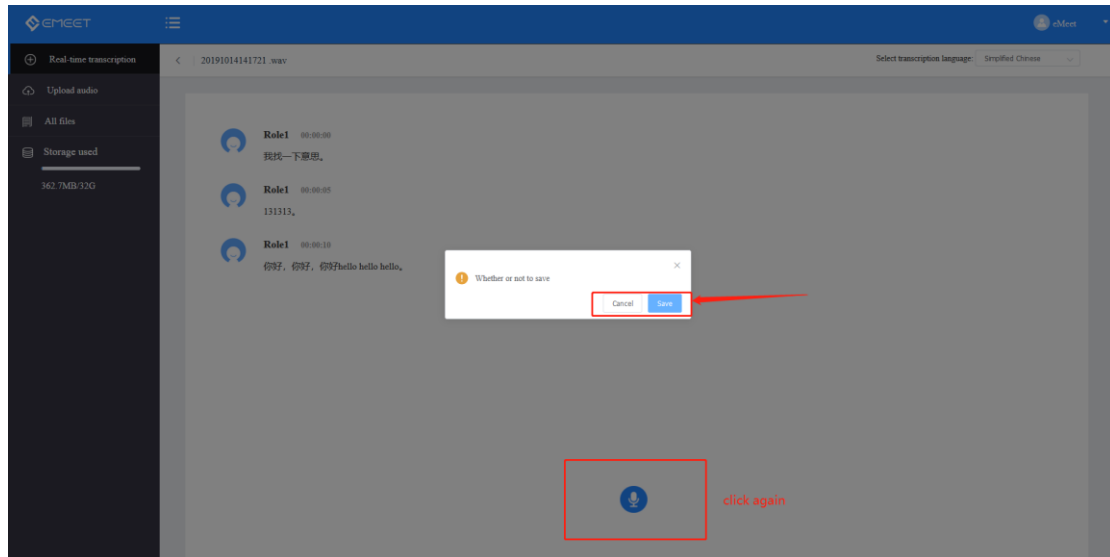

3 Turn on microphone permissions

4 Start transcoding in real time

5 Whether to save the file

The screenshot displays the eMeet application interface. On the left, a dark sidebar contains navigation options: 'Real-time transcription', 'Upload audio', 'All files' (highlighted with a red box), and 'Storage used' (showing 363.3MB/32G). The main content area shows a list of files with columns for file name, status, date, and size. A red arrow points from the 'All files' menu to the first file entry, '2019101414211.wav', which is marked as 'Transcribed'. Below the file name, the text 'saved address' is written in red.

File Name	Status	Date	Size
2019101414211.wav	Transcribed	2019-10-14 14:21:39	0.48M
